### Project Milestone & Activity Planning:

#### Milestone:

The latest technologies improve and optimize the performance of artificial intelligence (AI) models.

Yield-based disease prediction systems help farmers protect their crops from a variety of diseases. This allows diseases to be identified within the process of capturing images of plants and machine learning algorithms to name the affected diseases.

This project milestone provides a perfect solution for farmers who want to get the solution by themselves with a complete user-friendly and simple UI in a web application.

In addition, process we are planned to add a valid Module that is Fertilizer recommendation for the Specific Disease. It can give both Artificial fertilizer and Natural Fertilizer in suggestion manner.

Activity List:

In Project Management Planning is an Important task to scheduling the phrase of the project to the Team Member.

In this Activity can shows the various activity are allocated and Done by the Team Members!

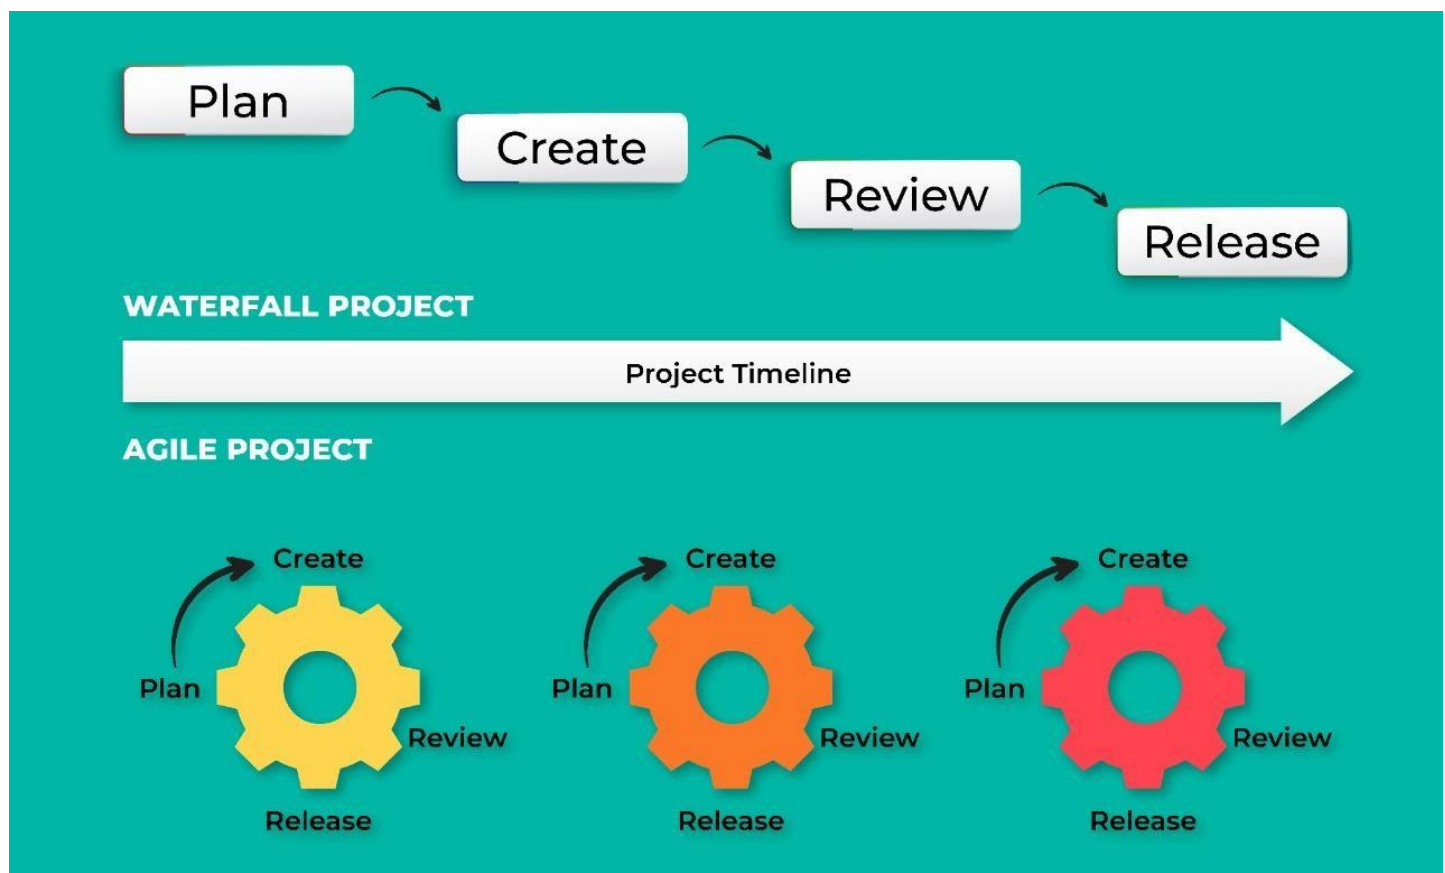

In Project we can Split into the Four Step of Phrases are

Phrase 1: Information Collection and Requirement Analysis

Phrase 2: Project Planning and Developing Modules

Phrase 3: Implementing the High Accuracy Deep Learning Algorithm to Perform

Phrase 4: Deploying the Model on Cloud and Testing the Model and UI Performance

Agile Methodology for Activity Planning
